**Abstract of JP 6124309 (A)**

**PURPOSE:**To estimate information that a user may desire and offer it to the user. **CONSTITUTION:**An access history means 1 controls the degrees of interest, user by user. A user identification deciding means 1 decides a user and an information selection and input means 2 accepts the specification of information to be used. An interest information selecting means 5 reads the specified information out of an information source 6 and displays it on a monitor 8 through an editing means 7. A user-classified access information classifying means 3 decides the classification that the specified information belongs to and sends the decided classification and decided user to the access history control means 4. The access history means 4 increases the degree of interest of the decided user as to the sent classification.; Then when the information selection and input means 2 accepts the specification of an automatic mode, the access history means 4 sends the classification which is set to the largest degree of interest of the user to the interest information selecting means 5. The interest information selecting means 5 reads information, belonging to the sent classification, out of the information source 6 and displays it on the monitor 8 through the editing means 7.
